

# Bacalao

*This is my first Release of 2008.*

*My inspiration for this map i got from the old Vietcong Game. Some parts of the map are influenced by the multip-layer Streammap of Pterodon.*

*If someone would like to say the map seem to be like crysis or farcry this wasn't my intentation. If someone of you remember the first Vietcong Part than you know why i did a revival of this map. The map isn't exactly the same map i changed a lot of things to give a better teambalance to the map.*

*I thought i want to create a different map type / location for COD4 and i tried to give a little bit of the old streammap feeling back.*

*The map is a open terrainmap but it is difficult to sniper on it. A lot of plants, trees and palms are hiding the view over the area, the ways to the camps and the middle of the map.*

## *Screenshots of the Map:*

I integrated some self modified camouflage skin in the map (iwd file) to balance the chances of both parties. You don't have to play with a mod on the server to have the jungle feeling or to fight SAS vs. Spez. woodland soldier type.

I modified single and multiplayer skins of coustard (thanks for the great work) to change both teams to woodland uniforms. The Marines playermodel i modded to german special forces. I also integrated small clan tags to the uniform of the both german clans who helped me to develop the tactics for the map. One Tag on the green barett of the opfor playermodel and one on the right arm of the german playermodels. I never integrated advertisement in my maps in the past and i don't want to do it in the future i only want to say thanks for all the work they did for me. i hope you will understand this.
